"I was amazed at how quickly my teeth got so straight.  
I'm so glad I didn't have to wear fixed braces."

## What is the **Inman Aligner**?

The Inman Aligner is the perfect solution for crowding or protrusion of the front teeth. It is really fast, very safe and great value compared to other systems.

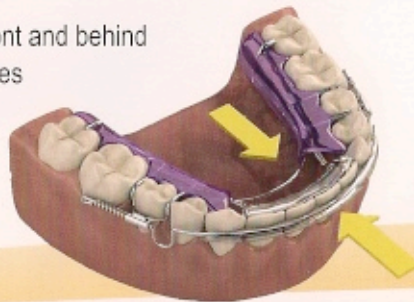

With the patented Inman Aligner, your front teeth can be gently guided to an ideal position in a matter of weeks. Most cases usually complete in 6-16 weeks and because it's removable you can take it out to fit your lifestyle.

## Can the **Inman Aligner** correct all crowded teeth?

The Inman Aligner is designed to treat the upper and lower front teeth only. After an evaluation, your dentist can determine if the Inman Aligner is right for your particular case and will recommend treatment options.

## How does the **Inman Aligner** work?

The Inman Aligner has two spring aligner bars in front and behind your front teeth creating a gentle pressure that guides these teeth into an ideal position. Once treatment is completed, a retainer is used to prevent relapse.
