CAN YOU TELL I'M WEARING BRACES?

Six Month Smiles Patient Testimonials

"I hid my smile for 25 years and now, after just six months, I'm happy to show off my smile to everyone. I can't stop smiling."

- Linda, age 55

"My only regret is that I didn't do this sooner!"

- Debrah, age 26

"I thought it was too good to be true when I found out that I could have straight teeth before my wedding . . . but it happened! Six Month Smiles is one of the best things I've ever done for myself. My wife is pretty thankful too."

- Neil, age 42

Are you uncomfortable when you smile?

Chances are, if you're reading this, your smile isn't something that you are proud of. Six Month Smiles is a revolutionary orthodontic system that provides a fast and economical way for adults to begin smiling with confidence. Regardless of age or gender, EVERYONE should be able to smile with confidence!

Frequently Asked Questions:

Q: What do Six Month Smiles Lucid-Lok™ braces and wires look like?

A: Six Month Smiles braces and wires are barely noticeable - they blend very well with the color of your teeth. These definitely aren't metal braces!

Q: How can the Six Month Smiles System straighten teeth in only six months?

A: The Six Month Smiles System employs new and specific orthodontic technology that provides for safe, comfortable and efficient tooth movement. Additionally, the aim of Six Month Smiles is to correct the items that you are unhappy with and not make time consuming changes to the way your back teeth bite together.

Q: Is the process uncomfortable?

A: Six Month Smiles involves light forces to gently move your teeth to their new position. The process is comfortable. The short treatment times are not achieved by using high forces on the teeth.

Q: Will I have to wear a retainer?

A: Yes, as with all orthodontic treatment, a retainer is necessary to maintain the straighter position of your teeth. If you don't want to wear a removable retainer, you can have a bonded retainer placed behind your teeth. There are a variety of options that you can choose from according to your personal preference and situation.

Q: What's the catch?

A: There is no catch. If you are an adult (15 years and older) with crooked or spaced teeth and you're not looking for a major alteration to your bite, this is a fantastic option for you!

Q: Does everyone really finish in 6 months?

A: Six months is the average treatment time. Most patients finish right around six months, but treatment times range from 4-9 months.
